RILM Abstracts of Music Literature with Full Text

RILM Abstracts of Music Literature with Full Text (RAFT) expands and enhances the unrivaled global bibliography of writings on music with nearly two million pages of full-text content from 239 key periodicals published in 50 countries and 40 languages, many of which are not available anywhere else online. Coverage includes articles and reviews as well as obituaries, editorials, correspondence, advertisements, and news. *RAFT* offers search and browse functionalities for each full-text issue, cover to cover.

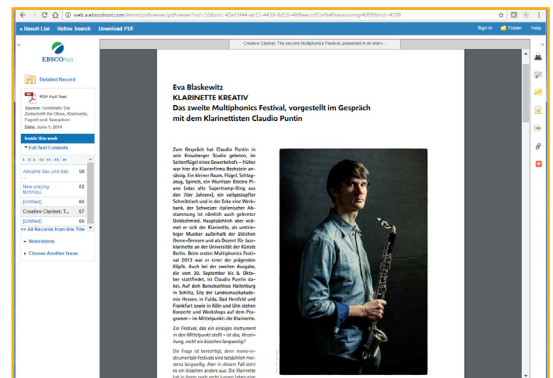

A Rich and Comprehensive Resource

RAFT builds on the flagship publication *RILM Abstracts of Music Literature*, the comprehensive, ever-growing database of curated entries on all types of publications on music (both print and digital) from 178 countries and in 143 languages. Covering literature from the early 19th century to the present, *RILM Abstracts* features over a million bibliographic records. This vast resource includes complete bibliographic

information with titles given in both the original language and English translation, and abstracts in English as well as the language of publication when available. Publications issued in non-Roman alphabets (i.e., Cyrillic, Chinese, Japanese, Arabic, Korean, and Hebrew) are represented bilingually. RILM's broad international coverage and expertly written abstracts, metadata, and in-depth vocabulary-controlled indexing distinguish it from all other music reference works.

Music Literature Across Disciplines

Like *RILM Abstracts of Music Literature*, the full-text content embraces all disciplines related to music, including musicology, theory, pedagogy, and performance. It also reflects RILM's robust coverage of ethnomusicology, popular music, and jazz studies as well as interdisciplinary subjects such as

archaeology, dance studies, dramatic arts, literature, pedagogy, philosophy, psychology, and therapy. No other online music bibliography or full-text aggregation offers comparable coverage, abstracting, and indexing.
